

VISION STATEMENT
CAMERON ISD SCHOOL HEALTH ADVISORY COUNCIL

The primary function of a school is to provide students with the learning experience necessary for maximum intellectual development. The success of this process is limited by the child's emotional, social, and physical health. For this reason, the purpose of a comprehensive school health education program is twofold: first, to consider the total human being in the educational process, and second, to motivate students to help themselves and others to healthy, productive lives.
